

How to Thread Your Sling

2. Cinch the tail of your sling like an accordion.

3. Thread the sling thru both rings without twisting the tail.

4. Bring the tail back thru one ring.

5. Put your arm thru the sling and place it on whichever arm you prefer.

6. Give yourself enough slack to fit the baby in the formed pocket.

7. Support your baby's weight until you have him or her tightly secured in the sling. Tighten both rails by tightening the outside and inside of the tail to customize the fit.
